Modules
Covered

This document provides a comprehensive specification of all frontend pages for the AgentTrack AI platform. Each page is described with its purpose, core UI components, data it displays, user interactions, and navigation flows. It serves as the primary reference for frontend developers building the React.js interface with Tailwind CSS.

Table of Contents

01	Login Page	3
02	Admin Dashboard	4
03	Employee Management Page	5
04	Project Management Page	6
05	Task Management Page	7
06	Employee Dashboard	8
07	Manager Dashboard	9
08	Reports Page	10
09	Risk Alerts Page	11
10	Workload Analysis Page	12
11	Manager Insight Chatbot Page	13
■ ■	Navigation Architecture	14

01 Login / Authentication Page

Public

Module Reference: Module 1: Authentication & Authorization

The single entry point to the platform. All roles (Admin, Manager, Employee) authenticate here. On successful login the JWT is decoded and the user is redirected to their role-specific dashboard automatically.

UI Components

- Logo & platform name header
- Email input field
- Password input field with show/hide toggle
- Login button (primary CTA)
- Form validation error messages
- Loading spinner during API call
- Forgot Password link (nice-to-have)

Data Displayed

- No live data — static form
- Error messages from API (wrong credentials, account inactive)
- Role decoded from JWT on success

User Interactions

- Submit login form
- Toggle password visibility
- See inline validation errors
- Automatic redirect post-login

Navigation Flow

- **From:** Direct URL / application entry
- **To:** Role dashboard after login

02 Admin Dashboard

Admin

Module Reference: Module 2: Employee Mgmt · Module 3: Project Mgmt

Central control panel for the Admin role. Provides a bird's-eye view of the entire organisation — total users, active projects, and system health — and acts as a launchpad to all admin-level management pages.

UI Components

- Top navbar with profile avatar & logout
- Left sidebar navigation (collapsible)
- KPI stat cards (Users, Projects, Active Tasks, Completion Rate)
- Recent Activity feed
- Quick-action buttons (Add Employee, Create Project)
- System health / status indicator

Data Displayed

- Total employee count
- Total project count & statuses
- Recent ActivityLogs entries
- System uptime / health metrics

User Interactions

- Navigate to Employee Management
- Navigate to Project Management
- Click activity items for details
- Logout

Navigation Flow

- **From:** Login Page (Admin role)
- **To:** Employee Mgmt / Project Mgmt / Analytics

03 Employee Management Page

Admin

Module Reference: Module 2: Employee Management

Allows the Admin to manage the full employee directory — adding new employees, viewing their profiles, updating their details, and assigning them to projects. This page is the primary interface for the Users collection.

UI Components

- Data table / list of all employees
- Search bar (filter by name/email/department)
- Role & department filter dropdowns
- Add Employee modal / form
- Edit Employee modal / form
- Active / Inactive status toggle
- Assign to Project button per row
- Profile image upload

Data Displayed

- Employee list from Users collection
- Name, email, role, department, designation
- isActive status
- Assigned project count

User Interactions

- Add new employee (form submit)
- Edit employee details
- Activate / deactivate account
- Assign employee to project
- Search & filter table
- View employee profile

Navigation Flow

- **From:** Admin Dashboard
- **To:** Project Management / Employee Profile

04 Project Management Page

Admin

Manager

Module Reference: Module 3: Project Management

Central hub for creating and tracking all projects. Managers see only their own projects; Admins see all. Shows project status at a glance and allows drilling into individual project details.

UI Components

- Project cards / list with status badges
- Create Project button + modal form
- Edit Project modal
- Status filter tabs (Active / Completed / On-Hold)
- Progress bar per project card
- Manager assigned label
- Start & end date display
- Search bar

Data Displayed

- Projects collection (title, status, progress)
- Manager name (via managerId)
- Start/End dates
- Task count per project (aggregated)

User Interactions

- Create a new project
- Edit project details
- Change project status
- Click project to view tasks
- Filter by status

Navigation Flow

- **From:** Admin Dashboard / Manager Dashboard
- **To:** Task Management / Project Detail

05 Task Management Page

Manager

Module Reference: Module 4: Task Management

The primary workspace for Managers to create, assign, and track individual tasks within a project. Supports setting priority levels and deadlines, and viewing the real-time completion percentage of each task.

UI Components

- Project selector dropdown
- Kanban board OR task list (toggle)
- Columns: Pending / In Progress / Completed
- Task cards (title, assignee avatar, priority badge, deadline)
- Create Task button + modal form
- Assign To employee dropdown
- Priority selector (Low / Medium / High)
- Deadline date-picker
- Estimated hours input
- Completion % slider / input

Data Displayed

- Tasks filtered by selected project
- Assigned employee names
- Priority & status values
- Deadline dates
- completionPercentage

User Interactions

- Create new task
- Drag-and-drop card between columns
- Edit task details
- Update task status
- Assign / reassign to employee
- Change priority

Navigation Flow

- **From:** Manager Dashboard / Project Management
- **To:** Employee Dashboard (assigned tasks visible)

06 Employee Dashboard

Employee

Module Reference: Module 5: Employee Dashboard · Module 4: Task Management

Personal workspace for each Employee. Gives a focused view of their own tasks, upcoming deadlines, and progress — without exposing other employees' data. Employees can update their task progress directly from this page.

UI Components

- Greeting header with employee name
- My Tasks section (list/card view)
- Task status badge (Pending/In-Progress/Completed)
- Progress percentage bar per task
- Deadline countdown chips
- My Projects section
- Upcoming Deadlines widget (sorted chronologically)
- Notification bell with count

Data Displayed

- Tasks where assignedTo = current user
- Projects via ProjectMembers
- Task deadlines & priorities
- Notifications for this user

User Interactions

- Update task progress (slider / status dropdown)
- Submit task update (adds TaskUpdate record)
- View task details
- Mark task completed
- View assigned projects

Navigation Flow

- **From:** Login Page (Employee role)
- **To:** Task Detail / Notification Panel

07 Manager Dashboard

Manager

Module Reference: Module 6: Manager Dashboard

The command centre for Managers. Aggregates all project health metrics, team productivity data, AI-generated alerts, and quick-access summaries to allow informed, fast decision-making without switching pages.

UI Components • KPI cards (Active Projects, Completed Tasks, Pending Tasks, Delayed Tasks) • Team Overview panel (employee workload chips) • Project health list with progress bars • Risk Alert banner / widget • Latest AI Report summary card • Upcoming Deadlines timeline • Quick-links to Reports, Risks, Chatbot • Notification bell	Data Displayed • Projects collection (status, progress) • Tasks (pending/completed/delayed counts) • Latest Reports.summary • Active Risks (resolved=false) • Team members & task counts
User Interactions • Click project to drill down • Dismiss / view risk alerts • Navigate to AI Chatbot • View full reports • Manage tasks shortcut	Navigation Flow • From: Login Page (Manager role) • To: Task Mgmt / Reports / Risk Alerts / Workload / Chatbot

Module Reference: Module 7: Reporting Agent

Displays AI-generated daily, weekly, and project-summary reports produced by the Reporting Agent. Reports are pre-cached in the Reports collection so they load instantly. Managers can manually trigger a new report generation.

UI Components

- Report type selector (Daily / Weekly / Project Summary)
- Project filter dropdown
- Date range picker
- Report card with AI-generated summary text
- Completed Tasks list within report
- Pending Tasks list within report
- Generate New Report button
- Download / Export report button
- Report timestamp label

Data Displayed

- Reports collection (summary, completedTasks, pendingTasks)
- generatedAt timestamp
- Linked task titles via ObjectIds refs

User Interactions

- Filter reports by type / project / date
- Trigger manual report generation
- Download report as PDF
- Navigate to a specific task from report

Navigation Flow

- **From:** Manager Dashboard
- **To:** Task Detail

09 Risk Alerts Page

Manager

Module Reference: Module 8: Risk Prediction Agent

Dedicated page for reviewing all active risks identified by the Risk Prediction Agent. Managers can acknowledge, investigate, and mark risks as resolved. Unresolved high-risk items also surface on the Manager Dashboard.

UI Components

- Risk cards with severity badge (Low / Medium / High)
- Project & Task reference links per risk
- AI-generated reason text
- AI recommendation text
- Resolve button per risk card
- Filter by risk level
- Filter by project
- Resolved / Active toggle
- Risk trend summary (counts by level)

Data Displayed

- Risks collection (riskLevel, reason, recommendation, resolved)
- Linked project names
- Linked task titles
- createdAt timestamps

User Interactions

- View risk details
- Mark risk as resolved
- Filter by severity
- Navigate to affected task/project
- View resolved risk history

Navigation Flow

- **From:** Manager Dashboard (Risk Alert widget)
- **To:** Task Management / Project Management

10 Workload Analysis Page

Manager

Module Reference: Module 9: Workload Analysis Agent

Visual representation of employee workload distribution generated by the Workload Analysis Agent. Helps managers quickly identify overloaded team members and act on AI-powered task redistribution recommendations.

UI Components

- Workload distribution bar/chart per employee
- Employee list with task count badges
- Overloaded indicator (red highlight when >threshold)
- AI Recommendation cards
- Recommended task reassignment panel
- Project filter
- Capacity utilisation percentage per employee
- Estimated hours breakdown

Data Displayed

- Tasks grouped by assignedTo
- estimatedHours per task
- Employee name & designation
- Workload Agent recommendations

User Interactions

- View workload per employee
- Accept / act on task redistribution suggestion
- Navigate to reassign a specific task
- Filter by project

Navigation Flow

- **From:** Manager Dashboard
- **To:** Task Management (to reassign tasks)

11 Manager Insight Chatbot Page

Manager

Module Reference: Module 10: Manager Insight Chatbot

An AI-powered conversational interface allowing Managers to query the platform in natural language. The chatbot maintains conversation history (stored in AgentConversations) and can answer questions about projects, employees, tasks, risks, and reports in real time.

UI Components • Chat window with message history • User message bubble (right-aligned) • AI response bubble (left-aligned) with typing indicator • Text input field + Send button • Suggested query chips (quick prompts) • Session selector (new/previous conversations) • Clear conversation button • Timestamp per message	Data Displayed • AgentConversations collection (messages array) • Dynamically fetched project / employee / task data per query • AI-generated natural language responses
User Interactions • Type and send a natural language query • Click suggested prompt chips • Start a new conversation session • Scroll through chat history • Copy AI response to clipboard	Navigation Flow • From: Manager Dashboard • To: None (self-contained chat interface)

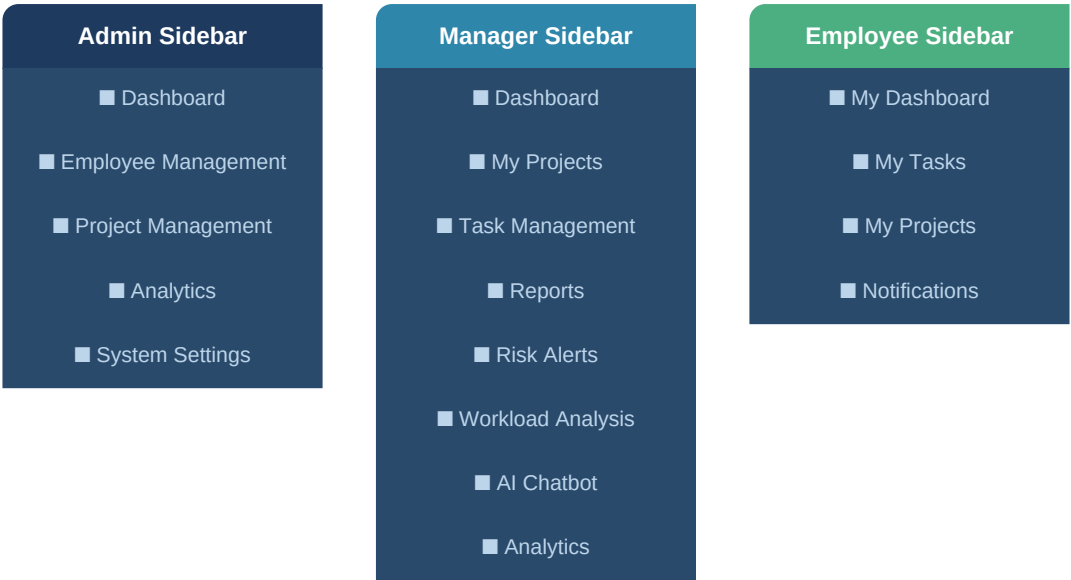

Navigation Architecture

The application uses React Router v6 with role-based route guards. All authenticated routes are wrapped in a persistent sidebar/navbar layout. Public routes (Login) are accessible without authentication.

Route Path	Page / Component	Accessible By	Guard
/	Login Page	Public	None
/admin/dashboard	Admin Dashboard	Admin	AdminGuard
/admin/employees	Employee Management	Admin	AdminGuard
/admin/projects	Project Management	Admin, Manager	ManagerGuard
/manager/dashboard	Manager Dashboard	Manager	ManagerGuard
/manager/tasks	Task Management	Manager	ManagerGuard
/manager/reports	Reports Page	Manager, Admin	ManagerGuard
/manager/risks	Risk Alerts Page	Manager	ManagerGuard
/manager/workload	Workload Analysis	Manager	ManagerGuard
/manager/chatbot	Manager Insight Chatbot	Manager	ManagerGuard

/employee/dashboard	Employee Dashboard	Employee	EmployeeGuard
/analytics	Analytics Dashboard	Admin, Manager	ManagerGuard

Sidebar Navigation Structure

Authentication & Redirect Flow

Step	Action	Result
1	User visits any protected route unauthenticated	Redirected → /login
2	User submits login with valid credentials	JWT stored in localStorage
3	JWT decoded to extract role	Redirect → role-specific dashboard
4	Admin logs in	Redirect → /admin/dashboard
5	Manager logs in	Redirect → /manager/dashboard
6	Employee logs in	Redirect → /employee/dashboard
7	Token expires or logout	Clear token → Redirect → /login
